## **California Proposition 65 Compliance Statement**

Consistent with our core values, JEM Technical strives to provide high quality, safe products to our customers. We are dedicated to working with our customers and suppliers to meet requirements applicable to our products, including California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986.

This Act, establishes a list of chemicals which the state of California's risk assessment process has determined to present a risk of cancer, birth defects or other reproductive harm. Proposition 65 requires that businesses operating in California as well as businesses marketing or selling product in California provide a fair and reasonable warning unless the exposure level from the product is low enough to qualify for a conservative "Safe Harbor" level.

The Proposition 65 chemical list can be found at: <https://oehha.ca.gov/proposition-65/proposition-65-list>

None of the substances on the California Proposition 65 list are intentionally added in our finished product. However, JEM Technical has instituted as company-wide policy to warn and identify all products shipped to our customers. JEM Technical is applying a warning on all packing documentation to ensure compliance with the California law.

Should you have further questions regarding the warning language, please contact JEM Technical.
